

ISTERH2013 特別講演

- 1) "Zinc in Human Health: It's discovery 50 years ago and the current impact now."
Ananda S. Prasad, MD, PhD (Distinguished Professor of Oncology, Karmanos Cancer Center, Wayne State University School of Medicine, Detroit, USA)
- 2) "The promise of copper lowering therapy with tetrathiomolybdate in the cure of advanced, previously incurable, cancer and treatment of inflammatory diseases."
George J Brewer, MD (Sellner Emeritus Professor of Human Genetics, Emeritus Professor of Internal Medicine, University of Michigan Medical School, Ann Arbor, USA)
- 3) "Wilson disease: A century of progress in diagnosis."
Michael L. Schilsky, MD (Medical Director of Adult Liver Transplant, Yale New Haven Transplantation Center, New Haven, USA)
- 4) "Metallostasis in Alzheimer's disease and Parkinson's disease."
Ashley I. Bush, MB BS, DPM, FRANZCP, PhD, FTSE (Professor of Neuroscience, Florey Institute of Neuroscience and Mental Health, University of Melbourne, Parkville, Australia)
- 5) "Zinc as a signaling molecule."
Toshio Hirano, MD, PhD (President of Osaka University, Osaka, Japan)
- 6) "Monitoring of body iron metabolism in health and disease."
Yutaka Kohgo, MD (Professor of Medicine, Asahikawa Medical University, Asahikawa, Japan)
- 7) "Elemental speciation analysis in human health assessment."
Kevin Francesconi (Professor of University of Graz, Graz, Austria)
- 8) "Copper dysfunction as a risk for Alzheimer's disease: predictive value of MCI conversion into dementia, meta-analytic evidence of increased copper and Non-ceruloplasmin copper in AD and new studies on ATP7B gene variants"
Rosanna Squitti, PhD (Dept. of Neuroscience, AFaR - Osp. Fatebenefratelli, Rome, Italy.)
